

## THE STRENGTH *of the* UNIVERSITY

The Universitat Autònoma de Barcelona (UAB) is a dynamic, modern and innovative institution, committed to its environment and the development of society in general and companies in particular.

In an ever changing world like ours, permanent education is one of the priority needs for professionals facing new challenges.

The Universitat Autònoma de Barcelona, a leading institution in education and investigation, in technology transfer and services, offers its experience and know-how to give support to corporate education programmes and a privileged environment to carry out these types of activities.

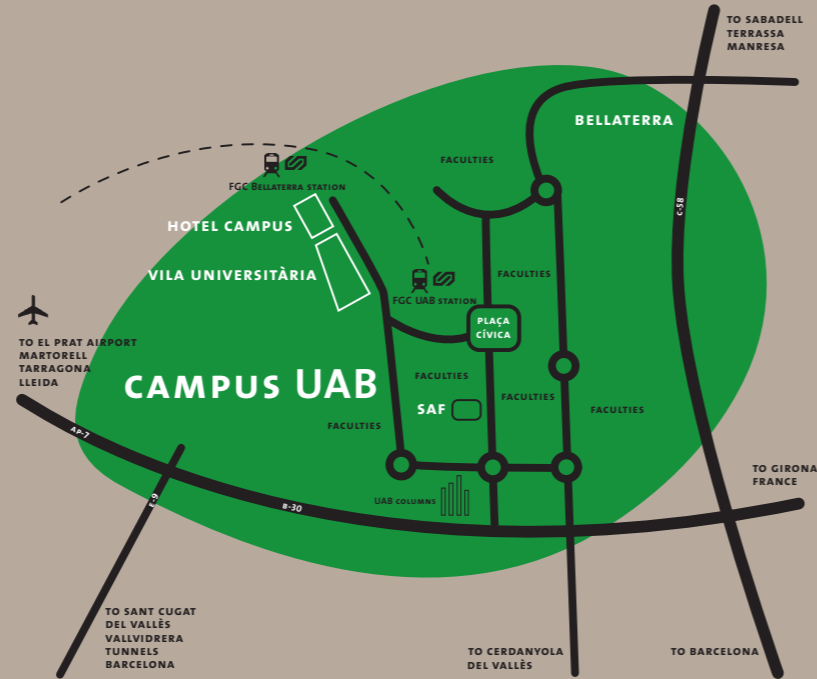

One of the most innovative methodologies within the frame of corporate education is Outdoor Training, which works different aspects of personality, through lived-out experiences and out of the usual work scene, often practised in the open air.

UAB puts at your disposal green spaces and campus facilities, from the fields and woods to the hotel-convention centre, for the organisation of all kinds of activities related to corporate education, indoors or outdoors.
